

APR Pressroom & Converting Solutions

Plate Care & Storage

Automated Plate Washers - APR

Designed for efficient automated cleaning of either letterpress or flexo plates, these units are designed to automate and improve productivity and performance.

Automated Plate Storage - Enviroxi

Designed to maximize efficiency in industrial operations, optimizing workflows and improving overall performance with a focus on automation and accuracy, these solutions enable more agile and secure materials management, reducing downtime and significantly increasing productivity.

Print Sleeve Mounting, Storage & Anilox Care

Plate Mounters - CAMIS

Sleeve Master Auto (SMA) offers "Hands free" plate registration and application to gain the maximum productivity of the pre-press department. The aim is to deliver automation without the issues often linked to this kind of technology.

Automated Print Sleeve Storage - Enviroxi

This automatic sleeve storage system offers a fully automated solution, maximizing available space. Its compact design allows for efficient installation, making the most of every square meter.

Laser Anilox Cleaning - TWEN

A laser cleaning solution that eliminates any ink residues deposited in the anilox cells safely and efficiently thanks to their advanced laser technology and intuitive machine configuration. Their laser cleaners will ensure that consistency in print quality is achieved every time.

Anilox QC Measurement - MicroDynamics

Veritas™ is the newest anilox microscope system from MicroDynamics. The new system offers the same accurate, repeatable results your favorite anilox OEMs have relied on for decades, now strategically priced for pressroom operations.

Pressroom Automation

Automated Roll Handling Solutions, AGVs & Trolleys - Enviroxi

Enviroxi's automatic reel unloader is designed to solve the reel changeover process, eliminating the need for manual handling and reducing changeover times to less than 3 minutes. This results in a significant increase in productivity and printing speed.

Automated Color Management - Techkon

Get real-time color measurements at full press production speeds - no more stopping the press to take measurements. True spectrophotometer - measure an entire color bar in a single printed impression.

Inspection Systems - AVT

Powerful print inspection for the entire production process. AVT's Helios product line is a uniquely comprehensive, automatic, 100% inspection solution for labels and other narrow web printing applications.

Web Flagging Systems - Novation

The AF3 WebFlagger has become an industry-standard in defect marking. Novation's AF3 WebFlagger automatically applies a pressure sensitive label or "flag" to almost any type of web moving at virtually all process speeds.

Distillation Systems, RTO Solutions, and Parts Washers

Pressroom & Converting Solutions

(continued)

Converting Solutions

Laser Scoring, Micro / Macro Perforating, Window Packaging - SEI Laser

SEI Laser's flexible packaging solutions are highlighted by the PackMaster and PackMaker family of products, featuring innovative solutions for laser cutting, scoring, and macro/micro-perforating products, as well as easy-open, window packaging, micro/macro perforation for easy ventilation.

Pouch / Bag Making Machines - ELBA

ELBA designs and manufactures modular, high-performance, and high-tech bag and pouch making machines. ELBA designs and manufactures machines for producing a wide range of bags with customizable and modular technology, according to each customer's production needs.

Slitters, Rewinders, and Core Cutters - Jurmet

Jurmet designs and builds **slitter-rewinders** in versions from entry level to high end. In addition, they equip their machines with a perforating module, a laser cutting station, a digital printing module, an inspection camera and a Work Flow module for print inspection.

Jurmet designs and builds **core cutters** in versions from entry level to high end (highly automated), including ones equipped with a system for individual marking of cut cores.

Make APR Your Equipment Supplier and Partner

Why APR?

Consider APR your resource for a complete range of solution-oriented products from respected industry leaders that offer proven cost reduction and timesaving opportunities. APR offers dependable service and unsurpassed technical support from our team of industry professionals.

Customers have many choices available to them when it comes to selecting a supplier of flexographic equipment, consumables, and technical support. The most common reasons that customers choose to work with All Printing Resources is a desire for a competitive advantage and understanding of latest innovative technologies. They are often looking to simplify and streamline prepress, platemaking, and pressroom operations and are driven by their own customer's demanding higher print quality. Our 4 Core Competencies have been fine tuned to a level of excellence to assist you in achieving your goals.

Service and Support from APR's Technical Solutions Group is the best in the industry.

Our Technical Solutions Group (TSG) has skill and expertise in all critical areas of the flexo process. This team is made up of industry professionals who are dedicated, up to date on new technologies, armed with the latest in diagnostic tools, and experienced in problem-solving that can achieve sustainable results. All of our TSG team members are FIRST Level III certified.

APR has factory-trained equipment service technicians to install, perform preventive maintenance, and service your equipment. We also carry a large selection of parts for the equipment lines we sell.
