

Highly adaptable modular bench construction system available in a range of standard sizes

Whether you want a straight, T or L shape configuration, the M-Bench System will create the perfect, stable cutting solution for your needs. It is ideal for the Sabre, Simplex and other general purpose Keencut cutting machines. The M-Bench has a modular construction which can be configured to suit your work environment and extended if your requirements change.

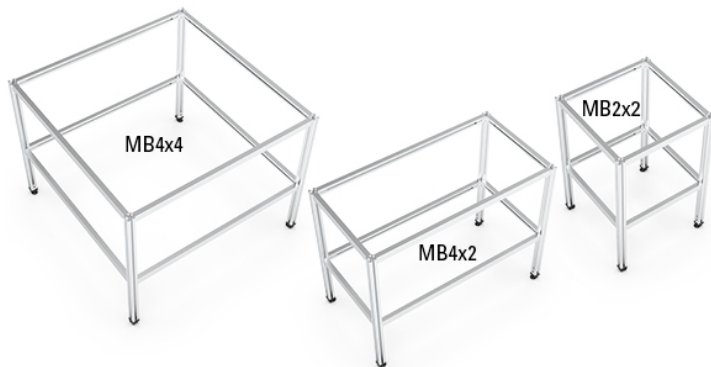

Strong, secure and stable

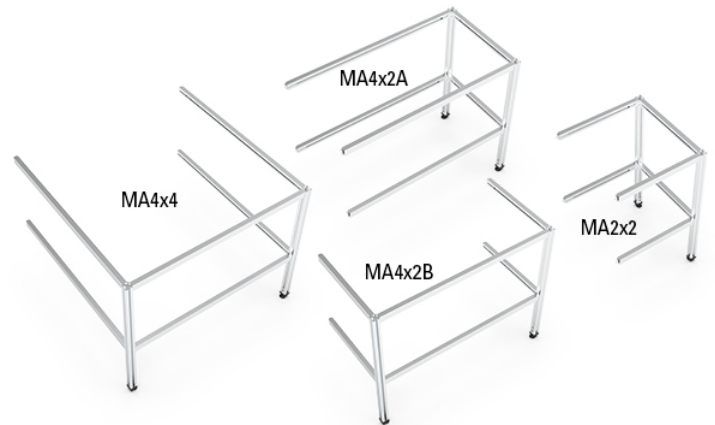

The M-Bench system provides the strong and solid foundation required for precise accurate cutting. The unique patented Proteus construction method creates a secure and rigid workbench that will not lose any stability over time. Strength and stability are vital to ensure that you achieve repeatable, reliable cutting. The Proteus construction is easy to assemble, and the internal fittings are concealed for a flush finish and maximum safety under heavy load.

Step 1: Choose from three different base units

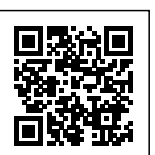

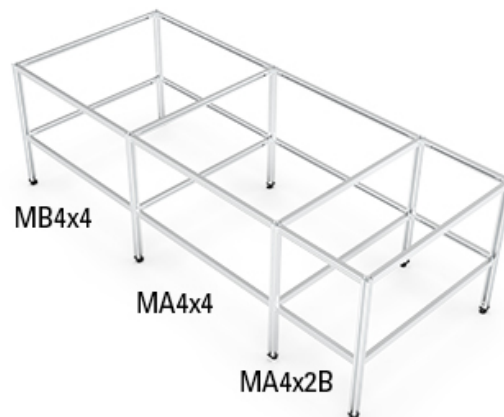

Step 2: Choose from four additional units

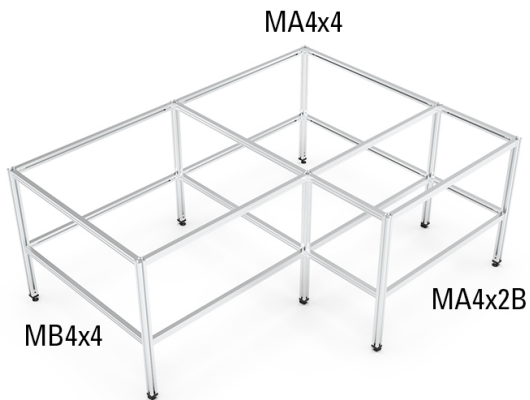

Fully customisable

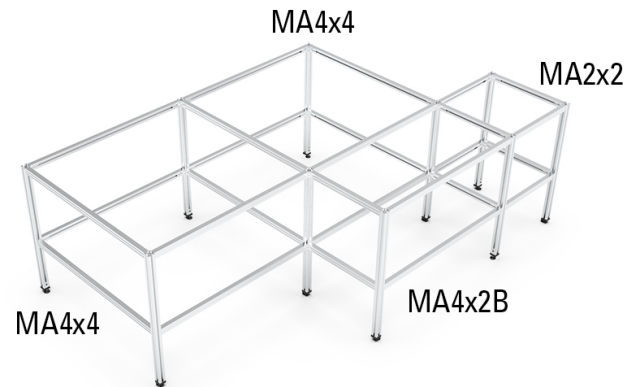

With a modular construction, the M-Bench is a truly versatile solution. You can create the perfect bench to fit your space and workflow.

Custom configuration bench

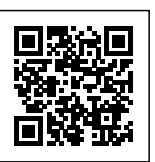

Worktop options

The M-Bench is supplied without a worktop, giving you the freedom to choose your own. M-Benches are designed so that you can use standard 0.61m (2') or 1.22m (4') width boards to form the worktop. Alternatively, you can fit a glass worktop. Please note, if fitting a glass worktop, you will need the optional white silicone cord and leg end caps.

Secure level surface

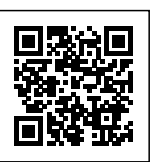

The unique assembly technique provides a secure, strong and rigid workbench. The adjustable feet provide precise levelling on uneven floors and maintains the flatness required to obtain precise cutting accuracy.

Five year guarantee

Built from high-grade aluminium alloy, the M-Bench offers a lifetime of service. The clean good looks are maintained through a quality anodising process. By manufacturing in-house, with only the highest quality materials, Keencut is confident to offer a comprehensive five year guarantee.

Bench	Length cm (")	Width cm (")	Height cm (")
MB4x4	116 (46)	116 (46)	90 (35)
MB4x2	116 (46)	60 (24)	90 (35)
MB2x2	60 (24)	60 (24)	90 (35)
