LUX ITP™

60

The premier LUX ITP plate product is LUX ITP **60**, a hard durometer plate formulated with award-winning technology from MacDermid. LUX ITP features the convenience of flat-top dots right out of the box. No additional platemaking steps or equipment are needed to take advantage of the print quality and consistency that LUX flat-top dots provide.

LUX ITP **60** is a 60 durometer plate that offers near 1:1 mask-to-plate imaging capability, thus eliminating the need for a bump curve. By removing the bump curve, printers are able to expand the available color gamut and print a smaller dot.

LUX ITP **60** is a durable and extremely low tack plate, which is perfectly suited for long and clean running print jobs. It is designed to be processed in either solvent or LAVA® thermal systems.

When you are looking to elevate your print to the next level, count on the flat-top dot technology leader - MacDermid.
