

HIGH END SOLUTIONS for PREPRESS, PRINT and PACKAGING

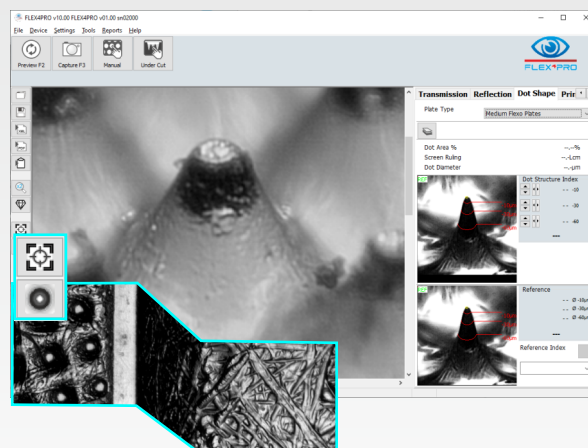

FLEX4PRO

FLEX4PRO, the new generation Flexo Analyzer **ALL IN ONE**
sets new standards in quality control for flexoplates, sleeves and print samples.

See what happens.
Measure what you see.
Understand why it happens.

Make data-driven decisions.
Increase productivity.
Reduce costs.

FLEXO PREPRESS

FLEX4PRO

FLEX4PRO Flexo Analyzer

FLEXO PREPRESS

The Flex4Pro is the next generation flexo plate and sleeve analyzer, controlling the whole flexographic printing process.

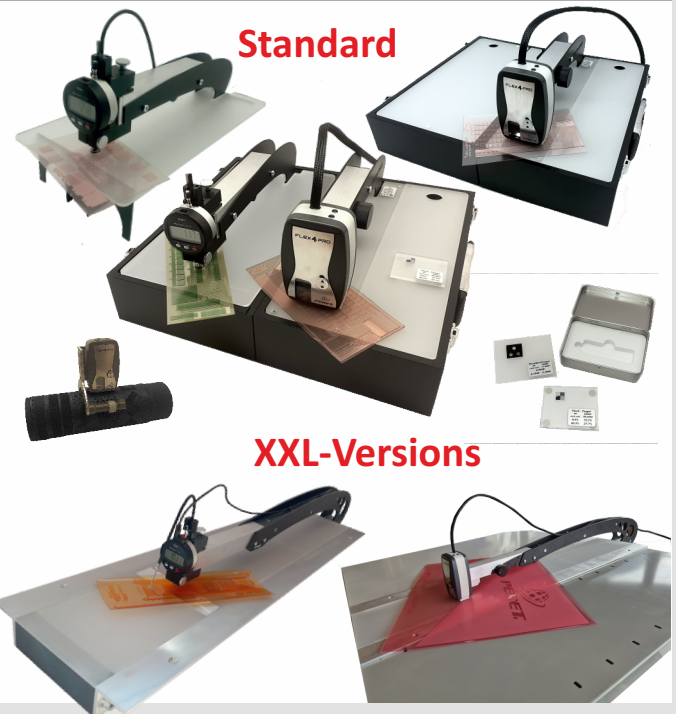

Combining high-resolution 3D analysis with advanced optical technology, it accurately measures dot geometry, screen ruling, dot area, microstructures, slur, and other critical parameters across plate, sleeve and print.

From minimum dot sizes and highlight gradients to ink laydown, mottle, graininess, and coverage, it reveals the details that matter for consistent high-quality print results.

Selectable focus levels enable precise analysis of deeper plate structures and plate-floor cleanliness. Compact, portable, and ready for on-site use, it is the ideal solution for service engineers and labs alike.
