

## MAINTENANCE

### ● Deep cleaning gel COBRA

will restore the transfer capacity of your **ceramic anilox rolls!**

• **Supplied as a kit that includes:**

- 1 kg of product (6 m<sup>2</sup> of surface to clean)
  - neutralizing powder
  - gloves and glasses
  - special rinsing paper
- Cleaning time from 20mn to 2 hours for the most difficult cases (steel brush recommended).
  - Can be used in or out of press (recommended).

The CLEAN and COBRA products can clean any type of inks (water, UV, solvent for Flexo and Gravure) and any coating products (UV and acrylic varnishes for Offset).

### ● Regular maintenance gels

#### CLEAN

For the most usual cases

#### CLEAN PLUS

Stronger version for difficult cases

They can be used out of press for deep cleaning, but for preventive maintenance, RECYL recommends to use them directly in the inking group.

**Packaging:** 800g bottle

**Cleaning time:** from 15mn (weekly cleaning) to 48 hours (for the most difficult cases)

**Rinsing with water:** These tyxtotropic products will not dry before rinsing.

**Application:** Ceramic, chromium and rubber rolls

**Any type of inks**

**UV and acrylic varnishes**
