

# *Sleeve Systems*

## Ultrasonic Cleaning Systems for Anilox Sleeves

### **Simple - Easy - Effective**

Its how we've made all our systems over the past 18 years. Our table top cleaning systems are the easiest to operate. All features are preset. No modifications to make - Whatsoever! Printers all over the world rely on them - Every Day.

### **Custom made to your sleeve specifications**

We'll look at your sleeve drawings. Design adapt-ers just for them and then design a system that works for you. How many sleeves do you want to clean at once? One...Two? We can accommodate whatever you want or need.

### **Budget Pricing**

At Sonic Solutions, custom made does **NOT** mean custom pricing. Go ahead. Look around. We have the other guys beat by 25-50% or even more.

### **Highest Quality Standards in the Industry**

With the introduction of our new Phoenix Series, we've taken this ball game to a new level. Gentler Ultrasonics, Generators that are now external, plug-n-play and 100% interchangeable, Removable Transducers, Heaters with low level protection and more... All this to keep your sleeves safer and the system working longer.

***Call us with your story....I'll make sure that it has a happy ending.***
