Validate the Performance of Your Device

NetProfiler™ for eXact™ 2

To set up your business for success, every eXact 2 device purchase comes with two years of end-to-end protection, including NetProfiler, for complete peace of mind and assured performance.

- NetProfiler is a cloud-based blend of software and color standards that uses a set of calibration tiles to remotely verify and optimize your eXact's performance.

- Running NetProfiler monthly from the convenience of your facility can correct issues caused by age, wear, or environmental conditions.

- After running NetProfiler, you will receive a certificate of performance to maintain ISO:9001 compliance.

Key Benefits of NetProfiler

Optimized Performance
Verify and optimize your eXact 2's performance based on your working environment.

Ensure Color Consistency Between Devices
Reduce color inconsistencies across your fleet, enabling you to measure and communicate consistent and accurate color.

Remain in Compliance
Perform monthly NetProfiler validations to maintain ISO:9001 certification.

Convenience
Validate and optimize your fleet's performance at your own facility, allowing you to identify concerns and inconsistencies across devices.
